This one-day course will provide basic information for anyone designing and operating drip and micro systems for landscape. Learn to design a system for single plants and bedding plants by calculating water requirements based on ET, soil & plant root zone storage capacity. Calculate application operating times & application rates. This course is also helpful for anyone planning to apply & write the CID Landscape Drip Design exam in future.

Pre-requisite: A general knowledge of Irrigation Design is an asset.

REGISTRATION DEADLINE

Registration is closed at 4:00 pm on Thursday, February 18th, 2022 to ensure delivery of course materials.
